

Immersive Reading

Supporting Student Focus through Read-Alouds

How Microsoft* education solutions compare to Google* in offering customized support for readers.

Immersive Reader Supports

The **language** in which a text is read aloud.

The **tone** of the voice.

The **speed** at which a text is read.

With only **three clicks**, students can begin a browser-based or document-based read aloud experience using Immersive Reader*.

Microsoft Windows 11 Read Aloud Experience

Built-in across Microsoft solutions

3 clicks to begin a read aloud experience

Available, built-in, to use in a browser tab and a document

Available offline

Google Chrome OS Read Aloud Experience

Requires installing third-party extensions

7 to 9 clicks to begin a read aloud

Available to use through third-party extensions in a browser tab and a document

Not available offline

Microsoft Word allows the Immersive Reader experience to be completed **completely offline.**

Given its built-in simplicity and ease of access across solutions, Immersive Reader is a better choice than Google options for customized read aloud support.
