K-12 BLUEPRINT

Microsoft Speaker Coach*

Empowering Students to be Agents of Their Own Learning

How Microsoft Speaker Coach* compares to Google Slides* in improving student presentation skills

Benefits of Microsoft Speaker Coach

Real-time feedback while practicing

Built into PowerPoint* for a streamlined experience

Actionable analytics to help students self-reflect and set goals

Empower students with agency and autonomy to **improve their communication and presenting skills** in a low-stakes environment, at their own pace.

Microsoft Speaker Coach	Google Slides with Chromebook Screencast* and Yoodli*
Microsoft	**Google**
✓ Speaker Coach takes only 5 clicks from start to the summary report	✗ The Google solution takes 77% more clicks to record, download, upload, and review results
✓ Speaker Coach provides real-time feedback such as pace, inclusive language, filler word, and more all while the student practices	✗ Google Slides does not have a built in coaching tool and therefore no real-time feedback is available during practice
✓ Speaker Coach saves time because it is built into PowerPoint and doesn't require students to complete other tasks to get feedback	✗ The Google solution requires students to use three tools and manage multiple accounts to get feedback
✓ Speaker Coach provides actionable feedback in a summary report with visible data points and tips for improving	✗ Yoodli provides feedback but doesn't always provide tips for improvement and students must watch an additional video to receive suggested improvements

Microsoft Speaker Coach helps students develop their communications skills and take ownership of their learning by allowing them to set goals and reduce overall anxiety in a low-stakes environment.

The real-time feedback and actionable analytics offered by Speaker Coach provides a more streamlined, fast, and secure AI-based coaching experience for learners than the equivalent process using Google solutions.
