

The K-12 Blueprint Program Evaluation Toolkit

toolkits

The Program Evaluation Toolkit includes case studies, checklists, step-by-steps, program frameworks, forms, and presentations to help you to evaluate the impact of e-learning in your school or district.

Information Communication Technology (ICT) is an integral part of the lives of today's students, but the technology is still relatively new in terms of its educational potential. While simply putting technology in schools is not enough to impact learning, there is growing evidence that education technology in the classroom can positively influence student outcomes - with benefits ranging from higher scores in school subjects to the learning of entirely new skills vital to succeeding in the 21st century.

The resources in this toolkit are designed to help you evaluate the impact of your e-learning program. They are adaptable to multiple settings so that you and your team can better understand the impacts and benefits of technology in the classroom.

Discover the critical resources, tools and information you need when planning for program evaluation in your school or district. www.k12blueprint.com/evaluation.
