

The K-12 Blueprint Funding Toolkit

toolkits

The Funding Toolkit includes case studies, checklists, step-by-steps, frameworks, forms, and presentations to help in the planning process for funding technology plans in your school or district.

A major part of any long-range technology strategy is developing a plan to pay for that technology. It starts by asking the right questions. For instance, how have other districts funded their technology plans? What are the funding options out there? What are the costs involved in an education technology investment?

This toolkit is intended to help craft a comprehensive and actionable plan to secure funding.

Discover the critical resources, tools and information you need when planning for funding technology initiatives in your school or district. www.k12blueprint.com/funding.
